Keith and Dara,

As FYI, we will be testing one of our sirens in Apex tomorrow morning around 10 am. We are sharing the information below with our local district manager, our customer service representatives and our social media team. We are not planning on doing a news release, but have shared this information with media outlets who have reached out to us tonight.

I am sure you both probably already know this, but wanted to share with

you – just in case. I know our EP team has been talking with your teams about the tests.

Thank you - and please let us know if you have any questions.

Tina

Subject: Harris Nuclear Station personnel to test one siren in Apex, NC Saturday morning

In response to the inadvertent sounding of the emergency siren located in Apex, N.C. (near Jenks Road and Walmart), Friday afternoon, Duke Energy is actively working with Wake County and the State of N.C. emergency management to determine why it sounded. On Saturday, Jan. 20, around 10 a.m., technicians we will be doing maintenance and testing on the siren to further identify the cause of the inadvertent activation. The test will require that the siren sound at full volume for five seconds. This could require several tests. No action is needed by the public. This is only a test.

As FYI for you –

There are 83 sirens in the 10-mile area surrounding Harris Nuclear Plant. The sirens are tested regularly to ensure they are working properly -

For information on sirens: https://www.duke-energy.com/safety-and-preparedness/nuclear-safety/nuclear-power-plants

Also, emergency preparedness calendars are sent annually to all residents within 10 miles of the Harris Nuclear Plant. These

calendars (information in link above) share information on emergency notifications and what to do.
